Springer - Journal of Food Science and Technology Template

Food science is the basic science and applied science of food; its scope starts at overlap with agricultural science and nutrition and leads through the scientific aspects of food safety and food processing, informing the development of food technology. The Institute of Food Technologists defines food science as "the discipline in which the engineering, biological, and physical sciences are used to study the nature of foods, the causes of deterioration, the principles underlying food processing,

Food science - Wikipedia

This text is designed with a user-friendly approach to Food Science for the non-major. This text reviews an Introduction to Food Components - quality and water. Next it addresses carbohydrates - including starches, pectins and gums, breads and pasta, vegetables and fruits.
