There is a big difference to these motors, the responsiveness of the g16b is a cut above the g16a. I put a g16a in my sierra and it was good improvement over the 1.3, but when i bought a lwb g16b vitara with double the kilometres the g16a had it still shit all over the g16a. And the lwb was heavier aswell.

Hi all Suzuki fans - I'm hoping one of you can help me... During a recent overhaul of my Suzuki Vitara's 1.6l G16B engine, the engineer working on my cylinders cracked the block. I've hunted high and low for a replacement but have not been successful. I have, however managed to find a G16A block and I was wondering if the G16B head I have would fit it?

The Vitara pistons that they refer to are just those of the Suzuki G16 engine, which you have, so no need to change them out. The MAP clamp is to fool the ECU so it does not see boost, as this can do some really weird stuff at times. Timing and injection are both affected, and can cause either rich or lean at times and also misfires.
