Abstract: This security user guide contains detailed information about the device function commands of the DS28E38 and instructions on how to download the full DS28E38EVKIT developer software. It must be used in conjunction with its corresponding data sheet which contains pin descriptions, feature overviews, and electrical specifications.

DS28E38 Security User Guide - Maxim Integrated

The MAX038 is a high-frequency function generator that produces low-distortion sine, triangle, sawtooth, or square (pulse) waveforms at frequencies from less than 1Hz to 20MHz or more, using a minimum of external components. Frequency and duty cycle can be independently controlled by programming the current, voltage, or resistance.

I followed your links, but it seems that the only vendor is "Maxim Integrated Products". Is there any other company that produces MAX038 or its alternative? Not like most of the electronic components, which always have more than one manufacture, Max038 seems very unique and only has one vendor which is Maxim Integrated Products.
