You can search Google Books for any book or topic. In this case, let's go with "Alice in Wonderland" since it's a well-known book, and there's probably a free eBook or two for this title. The original work is in the public domain, so most of the variations are just with formatting and the number of illustrations included in the work. However, you might also run into several copies for sale, as reformatting the print copy into an eBook still took some work. Some of your search results may also be related works with the same title.

HIV is commonly transmitted via
unprotected sexual activity, blood
transfusions, hypodermic needles, and
from mother to child. Upon acquisition of
the virus, the virus replicates inside and
kills T helper cells, which are required for
almost all adaptive immune
responses. There is an initial period of
influenza-like illness, and then a latent,
asymptomatic phase.
