Small Animal Ophthalmology: What's Your Diagnosis? | Wiley

Entropion is an inward rolling of the eyelid. The problem is most common in the Shar Pei, Chow Chow, Bulldog, Retrievers, Rottweiler, and Setters. Although the exact genetic pattern is usually not known, the problem is most likely caused by many genes that are responsible for the overall head and face conformation.

Common Eye Diseases | Animal Eyes of NJ

Dog eye problems: glaucoma. Glaucoma in dogs is a very serious condition which can result in blindness. Glaucoma occurs when a greater amount of vitreous humor is produced than is eliminated, which increases pressure inside the eye, resulting in alterations of the optic nerve and retina.
