### The Mathematics Of Lottery Odds

If the powerball is drawn from a pool of numbers different from the main lottery, the odds are multiplied by the number of powerballs. For example, in the 6 from 49 lottery, given 10 powerball numbers, then the odds of getting a score of 3 and the powerball would be 1 in  $56.66 \times 10$ , or 566.6 (the probability would be divided by 10, to give an exact value of  $8815\ 4994220$
